

VOLVO PENTA IND. DIESEL TAD720GE ENGINE REPLACEMENT

The Project

CVS PentaPower was contacted directly by Glenshee Ski & Snowboard Centre, the UK's largest skiing and snowboarding resort who required a replacement Volvo Penta TAD720GE engine. Their existing engine needed a major overhaul but after discussions with our Business Development Manager, Richard Allen, it was deemed more cost effective to replace the engine like for like.

A replacement engine was ordered and delivered allowing them to be ready for the 2016 ski season at their site in Cairngorms National Park, Scotland.
